

Running multi-entity consolidations fast

Consolidations taking days to weeks, late board books, error-prone manual reporting, work running into evenings and weekends. Sound familiar?

With Sage Intacct, you can streamline multiple entity consolidation with a single solution.

How Sage Intacct changes multi-entity consolidation

One cloud-based shared environment

From a single log-in get a shared chart of accounts and share reports with no need to manually process data.

Continuous consolidation

When you need to close, most of the work is done for you, with eliminations automated.

Set up new entities in minutes

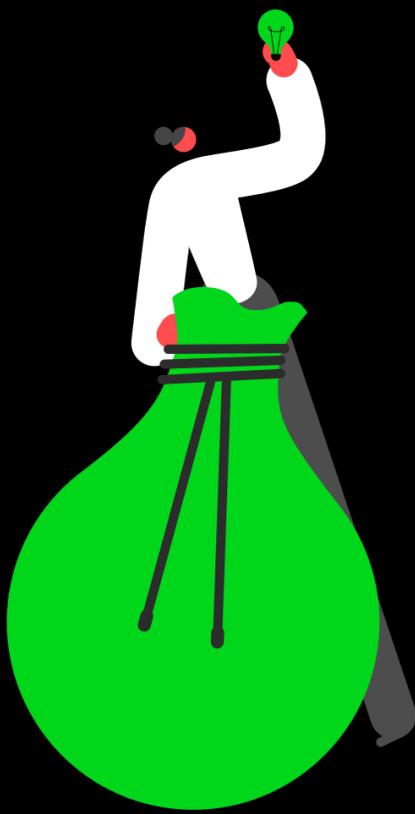

Completed without the need for IT involvement, with streamlined local or global consolidations and multi-currency needs.

Stay ahead

Automated processes mean your information is always up to date and accurate.

The power of the dashboard

Role-based dashboards give instant visibility into the KPIs that matter most—whether that’s for accounts people or the CFO.

Choose the most important KPIs like consolidation or month-end reporting and create individual dashboards for each.

Filter report results by entity or entity group to benchmark them against each other.

Get a clear picture of the health of your business and see where you are performing best.

Create as many consolidate views, GAP, IFRS or tax books as needed.

Automatically produce consolidation journals to make traceability of eliminations easy for troubleshooting reconciliations or audit.

The results

Boost efficiency with better, faster, and flexible multi-entity management

Gain visibility to make informed decisions for your organisation

Weeks → Minutes
100 entities consolidated in minutes

Claim back time normally spent on manual tasks to focus on more strategic analysis
